We have worked alongside our friends and suppliers to curate a selection of wines from obscure small producers to big name vineyards that make perfect pairings with our cuisine. We continue to see the demand grow for lighter, fresher wines that express regional and winemaker nuances.

In this edition of the wine list we have explored beyond just family owned, organic or biodynamic wines – we celebrate our female wine makers who have broken through glass ceilings and continue to take more risks and produce ever more exciting wines. ♀
